

## **CANCELLATION NOTICE**

### **LF 320, Request for Screening of Non-Federal Personnel for Access to Information Technology Resources**

**Cancelled effective 1-30-08**

LF 320, Request for Screening of Non-Federal Personnel for Access to Information Technology Resources (Rev. Jan. 2005) was the tool used for obtaining data from non-federal personnel to determine the level of security investigation needed for sensitivity of information (unclassified) handled. The Langley IT Security Manager reviewed the justification to ensure that assigned duties were consistent with the system sensitivity and access privileges requested. The form was then forwarded to the LaRC Security Office to receive NAC/NACLC investigation as applied. Because this function is now incorporated in the electronic e-QIP system and all employees now receive no less than a NAC1 investigation, this form is found obsolete and is officially cancelled.
